

BEDR**CK**[®]
THE SYSTEM TO DOCUMENT YOUR SYSTEM

"You don't really build
a great business, you
**build a great system
for your business,**
and that's the
business".

- Brett Linkletter, Founder of Misfit Media

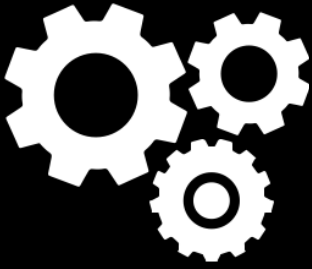

A business system is how you operate and the way you do things.

There are 100's of individual processes that span 16 core business areas that make up a business system.

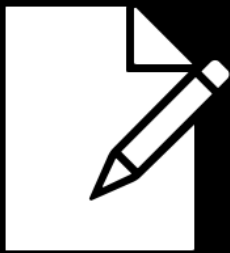

Effective **business systems** are formalised

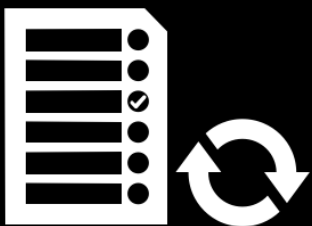

Structured

A business architecture framework that covers all processes across all business system areas.

Documented

All processes are documented consistently with enough detail to achieve efficiency, quality output and uniformity in execution.

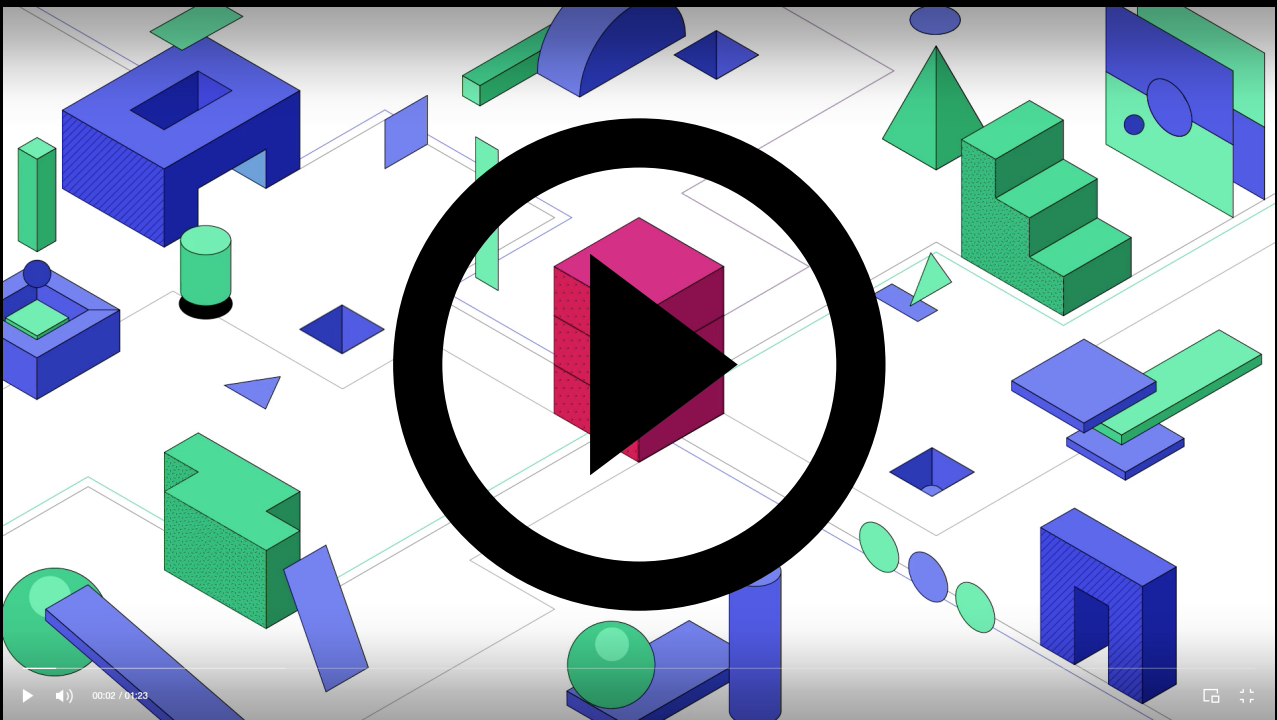

Activated

Processes are accessible and visible within a workflow management tool. Processes are usable and used, everything is up to date and completed in a singular cohesive manner.

This translates your business system into a **succinct operational workflow system.**

What people say about the **Bedrock System**

**"Extremely valuable for the
ongoing success of our business"**

- Mark and Fiona Wilson, Managing Directors, [Myriad Engineering](#)

**"Allows us the ability to scale the company
and take on more and more work"**

- Shane Sanderson, General Manager, [Sanderson Machines](#)

**"... the library system you've created
just makes sense. It's bloody brilliant"**

- Amadee Parker-Wadham, Managing Director, [Parka Insurances](#)

The Bedrock System formalises your system.

Bedrock has **customisable
pre-designed workflow
templates** for each business
area to **fast forward your
business system
formalisation by 70%.**

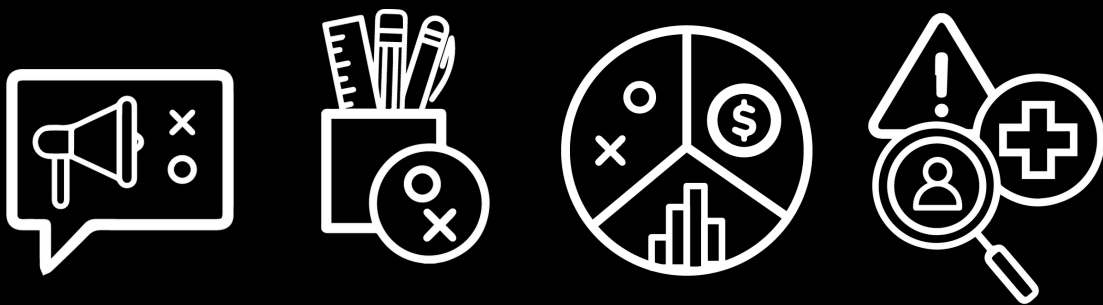

For the **2 sides** of your business

YOUR CORE CUSTOMER/REVENUE GENERATING PROCESSES

Highly unique to your business.

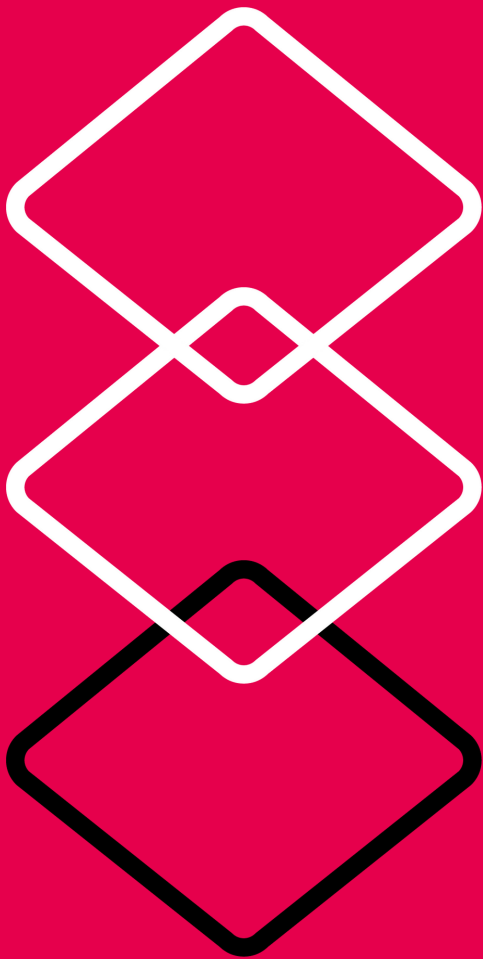

YOUR ENABLING PROCESSES

All supporting business processes that enable
you to do what you do best.

Covering the **3 critical layers** of your business system operations

Your system standard

The expected process to be followed across every business area

Monitoring the standard

Checking the standard is being undertaken

Responding to deviations from the standard

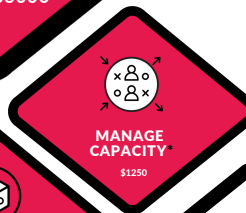

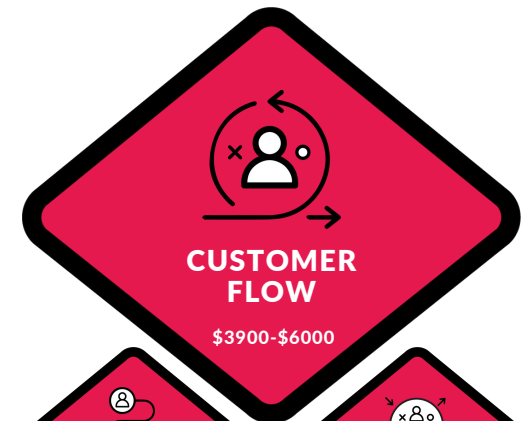

Managing process exceptions

Business System Activation

We partner with  **process.st**.
An online workflow management tool
with incredible functionality.

Using it on it's own is like starting from
scratch.

That's where we come in. The Bedrock
System provides the **set up, structure**
and **support** to document and activate
your business system.

How we work with you

	PRIMARY CUSTOMER WORKFLOW	OTHER CUSTOMER WORKFLOWS	ENABLING WORKFLOWS

ACTIVATE			
Test and Finalise the Workflow	1-3 hours	1-3 hours	1-3 hours
Assign/Schedule Workflow Runs			

* 'People' workflow may require additional workshop time.
Pricing is excluding GST and subject to change.

Other Bedrock System Costs

PROCESS ST SUBSCRIPTION

You will start on the Process St **Free** Subscription.

The Free Subscription is limited to the number of workflow templates and runs in your account. We will work with you to identify and manage when you need to transition to a paid subscription. We typically see this as no earlier than 6 months from the start of working with us.

At this transition point to a paid Process St **Pro** Subscription, either \$25USD per month or \$450USD per annum will be charged per member.

ONGOING BEDROCK SUPPORT

Outside of the initial Workflow Template fees, any on-going process/template build support work is charged at \$165 per hour. This is incurred on an as and when required basis to help you maintain the integrity of the Bedrock System architecture and your use of the system.

We are always here as your process partner.

Bedrock **loves** process.

We can't wait to work with
you to **build your strong
system.**

A single template gets you
started.
